With the economic crisis that began in 2008, a long-standing trend toward increased regulation is becoming a flood. The clamor for improved enterprise risk management and the complexity of multinational compliance present executives with a dramatically new array of challenges. Governance should offer solutions, but it is clear that yesterday ' s governance practices aren ' t up to the task. In both design and implementation, they are too disconnected and incomplete to fully address our complex compliance and risk management puzzle. Executives

This book is a first step in solving this problem so that your organization is prepared and able to respond and thrive in today ' s rapidly evolving environment. Under Control is the first book published in the new CAPress imprint, a joint publishing program between Apress and CA Inc. “ One of the defining factors of the first decade of the 21st century has been the increase of regulation and governance. Inc. enlisted more than a dozen subject matter experts from its ranks to contribute content. The resulting book explores the need for broad governance, different areas where governance is important, and various ways for organizations to manage and implement compliance, including IT governance, project portfolio management, information governance and sustainability management. The book, while largely vendor-neutral, draws on CA's experience creating governance solutions as well as managing its own governance issues. ” —Aaron Smith, Projects@Work
