Introduction to AutoCAD Plant 3D 2021 is a learn-by-doing manual focused on the basics of AutoCAD Plant 3D. The book helps you to learn the process of creating projects in AutoCAD Plant 3D rather than learning specific tools and commands. It consists of sixteen tutorials, which help you to complete a project successfully. The topics explained in the plant design process are: - Creating Projects - Creating and Editing P&IDs - Managing Data - Generating Reports - Creating 3D Structures - Adding Equipment - Creating Piping - Validate Drawings - Creating Isometric Drawings - Creating Orthographic Drawing - Project Management, and - Printing and Publishing Drawings

With stories of 50 incredible hiking routes in 30 countries, from New Zealand to Peru, plus a further 150 suggestions, Lonely Planet's Epic Hikes of the World will inspire a lifetime of adventure on foot. From one-day jaunts and urban trails to month-long thru-hikes, cultural rambles and mountain expeditions, each journey shares one defining feature: being truly epic. In this follow-up to Epic Bike Rides and Epic Drives, we share our adventures on the world's best treks and trails. Epic Hikes is organised by continent, with each route brought to life by a first-person account, beautiful photographs and charming illustrated maps. Additionally, each hike includes trip planning advice on how to get there, where to stay, what to pack and where to eat, as well as recommendations for three similar hikes in other regions of the world. Hikes featured include: Africa & the Middle East: Cape Town's Three Peaks (South Africa) Kilimanjaro (Tanzania) Camp to Camp in South Luangwa National Park (Zambia) Americas: Angel's Landing, Zion National Park (USA) Skyline Trail, Jasper National Park (Canada) Concepción volcano hike (Nicaragua) Asia: 88 Sacred Temples of Shikoku Pilgrimage (Japan) Markha Valley (India) Gubeikou to Jinshanling on the Great Wall (China) Europe: Wordsworth's Backyard: Dove Cottage and around Rydal and Grasmere (UK) Alpine Pass Route (Switzerland) Camino de Santiago (Spain) Oceania: Sydney's Seven Bridges Walk (Australia) The Routeburn Track (New Zealand) Kokoda Track (Papua New Guinea) About Lonely Planet: Lonely Planet is a leading travel media company and the world's number one travel guidebook brand, providing both inspiring and trustworthy information for every kind of traveller since 1973. Over the past four decades, we've printed over 145 million guidebooks and grown a dedicated, passionate global community of travellers. '...erudite, thought-provoking and well-written.' Archie Brown, Professor of Politics, Oxford University. The return to prominence of the concept of political culture offers an opportunity to re-evaluate its contribution to the social sciences. This study casts a broader than usual net, embracing not only political science (with equal emphasis placed on the concept's use in communist studies), but also sociology and history. On this basis a distinctive theory of political culture, and not merely another typology, is developed. Political culture, instead of being a token in the sterile debate between interest- and culture-based explanation, offers the means of transcending that debate.

Designed for introductory courses in aerodynamics, aeronautics and flight mechanics, this text examines the aerodynamics, propulsion, performance, stability and control of an aircraft. Major topics include lift, drag, compressible flow, design information, propellers, piston engines, turbojets, statics, dynamics, automatic stability and control. Two new chapters have been added to this edition on helicopters, V/STOL aircraft, and automatic control.

Slow sand filtration is typically cited as being the first "engineered" process in drinking-water treatment. Proven modifications to the conventional slow sand filtration process, the awareness of induced biological activity in riverbank filtration systems, and the growth of oxidant-induced biological removals in more rapid-rate filters (e.g. biological activated carbon) demonstrate the renaissance of biofiltration as a treatment process that remains viable for both small, rural communities and major cities. Biofiltration is expected to become even more common in the future as efforts intensify to decrease the presence of disease-causing microorganisms and disinfection by-products in drinking water, to minimize microbial regrowth potential in distribution systems, and where operator skill levels are emphasized. Recent Progress in Slow Sand and Alternative Biofiltration Processes provides a state-of-the-art assessment on a variety of biofiltration systems from studies conducted around the world. The authors collectively represent a perspective from 23 countries and include academics, biofiltration system users, designers,

and manufacturers. It provides an up-to-date perspective on the physical, chemical, biological, and operational factors affecting the performance of slow sand filtration (SSF), riverbank filtration (RBF), soil-aquifer treatment (SAT), and biological activated carbon (BAC) processes. The main themes are: comparable overviews of biofiltration systems; slow sand filtration process behavior, treatment performance and process developments; and alternative biofiltration process behaviors, treatment performances, and process developments.

Of all the new technologies that have evolved recently, integrated circuit technology is the one that continues to experience phenomenal growth. The vast amount of material arising from innovative circuit designs and newer device technologies requires that the circuit analysis aspects of digital electronics be covered in a first course, separate from device design and chip layout. Consequently, Introduction to Digital Microelectronic Circuits emphasizes the analysis and performance comparison of different gate-level logic circuits and presents design examples based on logic-level requirements. It provides an introduction to the analysis of digital electronic circuits using discrete and integrated circuits.
