ArcGIS API for Python. ArcGIS Notebooks are built on top of the Jupyter Notebook, an open-source web application that allows you to create and share documents that contain live Python code, visualizations, and narrative text. With ArcGIS Notebooks integrated into ArcGIS Pro, you can perform analysis and immediately view results in a geographic context, interact with the emerging data, document and automate your workflow, and save it for later use or share it.

Notebooks in ArcGIS Pro—ArcGIS Pro | Documentation

This workbook for Python scripting builds upon previously acquired GIS skills and takes them to the next level with the use of Python. Knowledge of Python—a key tool for scripting geoprocessing functions and tasks in ArcGIS for Desktop—is expanded through hands-on programming geared to automating GIS applications.

Esri Press Book Resources | GIS Tutorial for Python® Scripting

ArcPy and ArcGIS – Automating ArcGIS for Desktop and ArcGIS Online with Python This book requires your understanding of and experience in using Python. It is written for GIS professionals to enhance their knowledge and help automating repetitive tasks. It will familiarize you with ArcPy and make you able to conduct complex analysis more easily.

10+ Best ArcGIS Books For Beginners [2020] [UPDATED]

90 KB This practical, hands-on workbook will show you how to immediately become more productive with ArcGIS by using Python to streamline and automate tasks. Python, the scripting language for ArcGIS, is tightly integrated with ArcMap and ArcCatalog. This book is designed for the GIS professional with limited programming experience.

GIS Tutorial for Python Scripting - Esri

Open the Points, Polylines, Polygons, or Tables folder and double-click a data mapping workbook to open it. These workbooks adhere to the following naming convention: source-target.xlsx. The workbook opens, and the Mapping sheet is active. The sheets are color-coded based on their functionality.
