Motor Skills Acquisition in the First Year is a descriptive presentation of normal motor development and skill acquisition during the first year of life. It gives a greater understanding of normal motor development and normal movement in infants, in order to treat infants with delayed or aberrant movements. The goal of this book is to inform and enhance knowledge, understanding, and observational skills in the assessment of normal motor development, and to present an analysis of the motor components that babies use to achieve each milestone normally. It provides a background for enlarging the scope of kinesiological analysis and will serve as a stimulus for others to further investigate and analyze the kinesiological aspects of motor development.

As we see a shift of old forms that were once the foundations of our daily lives, parents--who must prepare the next generation to meet the changing world--have more questions today than ever before. Although our cultural values and family structures may change, it is the atmosphere in the home that continues to form the foundation of a child's life. In Heaven on Earth, parent and educator Sharifa Oppenheimer reveals how parents can make the home environment warm, lively, loving, and consistent with their highest ideals. Heaven on Earth balances a theoretical understanding of child development with practical ideas, resources, and tips that can transform family life. Readers will learn how to create the regular life rhythms needed to establish a foundation for learning; how to design indoor play environments that allow children the broadest development of skills; and how to create outdoor play spaces that encourage vigorous movement and a wide sensory palette. Through art, storytelling, and the festival celebrations, this book is an invaluable guide to building a "family culture" based on the guiding principle of love--a culture that supports children and encourages the free development of each unique soul. Sharifa Oppenheimer offers a gift from the heart. Heaven on Earth is a practical, inspiring resource that brings the author's informed, intuitive understanding of young children into the heart of the home. "Sharifa Oppenhiemer has given the world a great gift in the pages of this book. The important child-development information is exquisitely combined with the best 'How-to's' I have seen in any book for parents. Her book, is a ready guide that insures joyful, enthusiastic children who learn easily and contribute to their families and society for a lifetime. I have delighted in every page and feel this is absolutely A must read for parents, grandparents, teachers, and perhaps everyone who will ever touch the life of a child." --Carla Hannaford, Ph.D., biologist and international educational consultant to 32 countries and author of Smart Moves: Why Learning Is Not All in Your Head and Awakening the Child Heart, Handbook for Global Parenting "This delightful book will be a wonderful resource for parents. They will certainly appreciate its warm, friendly, personal, and reassuring tone. I would have loved such a book when I was a young mother! For those whose children already attend Waldorf programs, it provides a helpful resource for creating a bridge between home and kindergarten. For others, this lovely book offers wonderful glimpses into the wise and nurturing practices of Waldorf early childhood education. In a world where childhood is increasingly 'media'ted and 'adult'erated, this book offers much-needed support for the protection of childhood. " --Susan Howard, chairperson, Waldorf Early Childhood Association of North America and coordinator, International Association for Steiner/Waldorf Early Childhood Education "Being a parent is a challenging assignment, but with the help of Sharifa Oppenheimer's book, Heaven on Earth, our work immediately becomes easier. This book is both heartfelt and practical. It offers sound parenting principles with down-to-earth examples of how to raise children with both insight and grace." --Jack Petrash, director, Nova Institute, and author, Navigating the Terrain of Childhood: A Guidebook for Meaningful Parenting and Heartfelt Discipline

An Essential Tool for Preparing Your Child for Kindergarten and Beyond Reading aloud to your children is essential. Longtime elementary school teacher Kim Jocelyn Dickson believes every child begins kindergarten with a lunchbox in one hand and an “invisible toolbox” in the other. In The Invisible Toolbox, Kim shares with parents the single most important thing they can do to foster their child’s future learning potential and nurture the parent-child bond that is the foundation for a child’s motivation to learn. She is convinced that the simple act of reading aloud has a far-reaching impact that few of us fully understand and that our recent, nearly universal saturation in technology has further clouded its importance. In The Invisible Toolbox, parents, educators, and early literacy advocates will discover:
• Ten priceless tools that will fill their child’s toolbox when they read aloud to their child
• Tools parents can give themselves to foster these gifts in their children
• Practical tips for how and what to read aloud to children through their developmental stages
• Dos and don’ts and recommended resources that round out all the practical tools a parent will need to prepare their child for kindergarten and beyond
Essential book for parents. In The Invisible Toolbox, Kim weaves her practical anecdotal experience as an educator and parent into the hard research of recent findings in neuroscience. She reminds us that the first years of life are critical in the formation and receptivity of the primary predictor of success in school?language skills?and that infants begin learning immediately at birth. She also teaches and inspires us to build our own toolboxes so that we can help our children build theirs. If you enjoyed books like Honey for a Child's Heart, The Read-Aloud Handbook, Screenwise, or The Enchanted Hour; you will love The Invisible Toolbox?from a 21st century Charlotte Mason.
