Deadhouse: Life in a Coroner's Office chronicles the exploits of a diverse team of investigators at a coroner's office in Pittsburgh. Ed Strimlan is a doctor who never got to practice medicine. Instead he discovers how people died. Mike Chichwak is a stolid ex-paramedic, respected around the office for his compassion and doggedness. Tiffani Hunt is twenty-one, a single mother who questions whether she wants to spend her nights around dead bodies. All three deputy coroners share one trait: a compulsive curiosity. A good thing too because any observation at a death scene can prove meaningful. A bag of groceries standing on a kitchen counter, the milk turning sour. A broken lamp lying on the carpet of an otherwise tidy living room. When they approach a corpse, the investigators consider everything. Is the victim face-up or down? How stiff are the limbs? Are the hands dirty or clean? By the time they bag the body and load it into the coroner's wagon, Tiffani, Ed, and Mike have often unearthed intimate details that are unknown even to the victim's family and friends. The intrigues of investigating death help make up for

the bad parts of the job. There are plenty of burdens—grief-stricken families, decomposed bodies, tangled local politics, and gore. And maybe worst of all is the ever-present reminder of mortality and human frailness. *Deadhouse* also chronicles the evolution of forensic medicine, from early rituals performed over corpses found dead to the controversial advent of modern forensic pathology. It explains how pathologists read bullet wounds and lacerations, how someone dies from a drug overdose or a motorcycle crash or a drowning, and how investigators uncover the clues that lead to the truth.

DEATH, FEAR, LOVE, EMOTIONS, SPIRITS Step inside the mind of Donna Francart, a former Deputy Coroner, as she describes to you her years of Medicolegal Death Investigations. What began as her personal diary written to herself, her way of Debriefing, began to form a heartbeat of its own. She has allowed her inner most thoughts to be shared, with you, Of the fears, tears, and anger she battled with, along the way and the profound lessons she learned, not only from the dead but also from the living.

One of America's leading forensic anthropologists journeys to some of the nation's most infamous crime scenes to describe her work on such cases as the Oklahoma City bombing, the World Trade Center disaster, and the Branch Davidian complex at Waco, Texas, furnishing a vivid glimpse into a key area of criminal investigation. Reprint. 25,000 first printing.

New in the successful Colour Guides series, this volume is a practical, must-have guide for any professional involved with forensic medicine. It covers approximately 60 essential topics, each presented in a convenient two-page spread. The left-hand page contains brief, clearly-written text, while the right-hand page presents a wealth of relevant color photographs.

The bestselling author of *The Forensic Science of C.S.I.* examines the real-life cases behind the hit television series *Criminal Minds* Week after week, the hit TV show *Criminal Minds* gives viewers a look inside the psyches of the fictional serial killers tracked by the BAU (Behavioral Analysis Unit). This elite team of FBI agents travels the country assisting law enforcement officials by examining the crime scene, "profiling" the perpetrator, and aiding in arrest and interrogation. In this book Katherine Ramsland reveals how reality differs from fiction and how forensic psychologists actually use their knowledge of human behavior and motivations as consultants in criminal investigations—as well as detailing the real cases that influenced some of *Criminal Minds*'s most memorable episodes.

Two National Forensic Science Institute administrators invite readers into what the *Washington Post* calls "the Harvard of hellish violence"—the only hands-on CSI school of its kind where students are trained in burial recovery with actual human remains. With exclusive access to a world normally off-limits to the public, this is the first book to go behind the scenes of the ten-week course that discloses the uncensored realities of burial exhumations and the fascinating art of forensic investigation.

A look into the disturbing but fascinating new field of bio-recovery, as a critically acclaimed crime writer rolls up his sleeves and delves into the world of *Aftermath, Inc.* The best way to understand the world of *Aftermath, Inc.* is to imagine life before it. Grief-stricken families of suicide or homicide victims were left to cope on their own. Sometimes police would leave a can of ground coffee behind to soak up the mess. Sometimes local church groups offered to help with the horrific chaos of the scene. Into this void stepped Tim Reifsteck and Chris Wilson, who filled a desperate need by founding their bio-remediation company. Gil Reavill traces their history, introducing us to their clients and employees, and the cops, coroners, and detectives they encounter in their work. Their stories are stranger than fiction, and utterly human and compelling.
