The music was soft and sweet (not irritating like so many baby things), and DS liked the mobile and mirror. The motor on the swing died at about the six month mark. We then learned how common the motor issues with this swing. I had registered it so when I called Fisher Price they sent me a replacement motor at no charge.

With more than 1.3 million video views each month and over fifty-two million total views on her YouTube channel, Howland's (a.k.a. Mama Natural) funny but informational videos have empowered millions of women to embrace natural pregnancy and parenting. Now Howland is turning to the page, offering up the first week-by-week natural pregnancy book for soon-to-be moms. For the last half-century, control over childbirth has been in favor of doctors. Many pregnancy guidebooks are conventional, fear-based, and written by male physicians deeply entrenched in the old-school medical model of birth. But change is underway. A groundswell of women are taking back their pregnancy and childbirth and embracing a natural way. Genevieve Howland, the woman behind the enormously popular Mama Natural blog and YouTube channel, has created an inspiring, fun, and informative guide that demystifies natural pregnancy and walks mom through the process one week at a time. The Mama Natural's Week-by-Week Guide to Pregnancy and Childbirth is the modern (and yet ancient) approach to pregnancy and childbirth. "Natural" recognizes that pregnancy and birth are normal, and that

having a baby is a wondrous biological process and rite of passage—not a medical condition. This book draws upon the latest research showing how beneficial and life-changing natural birth is for both babies and moms. Full of weekly advice and tips for a healthy pregnancy, Howland details vital nutrition to take, natural remedies for common and troublesome symptoms, as well as the appropriate (and inappropriate) use of interventions. Peppered throughout are positive birth and pregnancy stories from women of all backgrounds (and all stages of their natural journey) along with advice and insights from a Certified Nurse Midwife (CNM) plus a Registered Nurse (RN), doula, and lactation consultant. Encouraging, well-researched, and fun, *The Mama Natural's Week-by-Week Guide to Pregnancy and Childbirth* will be an essential companion for women everywhere to embrace natural pregnancy and reap all the benefits for both baby and mama.

Discover the best baby sleep method—gentle, science-backed, and inspired by the latest Nobel Prize-winning research—that shows you how to get your baby to sleep through the night naturally. Sleep—or the lack of it—is one of the most crucial issues for new parents. Newborn babies typically wake every two to three hours, and there's nothing bleary-eyed, exhausted parents want more than a night of uninterrupted sleep. But while there's plenty of advice out there, there is nothing that's based on the latest cutting-edge research about sleep—until now. In *How Babies Sleep*, Sofia Axelrod, PhD—neuroscientist, sleep consultant, and mother of two—introduces the first baby sleep method that is truly rooted in the science of sleep. After having her first child, Axelrod realized that the typical baby sleep advice conflicted with the actual science of sleep, including the findings from her mentor's Nobel Prize-winning sleep lab. She developed her transformative method based on the latest discoveries about our body's circadian clock and how it is disturbed by light and other external stimuli. After seeing incredible results with her own babies, she has since counseled countless families in her groundbreaking method—which works with babies' needs and helps little ones learn to self-soothe, fall asleep more easily, and stay asleep through the night. You'll discover helpful tips that work, and learn: why using a red lightbulb (instead of a regular one) in the nursery at night can minimize wakings; why the age-old advice “don't wake a sleeping baby” isn't true; how to create a healthy routine; how to sleep train gently with minimal crying (under two minutes); and so much more in this revolutionary and effective book that will help both you and your baby enjoy a peaceful night's sleep.

После рождения дочери София Аксельрод, научный сотрудник из лаборатории Майкла Янга, получившего Нобелевскую премию за исследования молекулярных основ сна, обнаружила, что последние открытия в области хронобиологии невероятно актуальны для всех нас, и в особенности — для родителей маленьких детей. Применяя свои профессиональные знания на практике, она разработала уникальную методику, позволяющую наладить сон всей семьи и мягко приучить малыша к самостоятельному засыпанию без лишних слез и переживаний, легко и естественно. «В отличие от других подходов, которые в худшем случае основываются на частном мнении отдельных людей, а в лучшем – на представлениях педиатров о здоровье, моя программа зиждется на основополагающих биологических фактах, касающихся работы тела и мозга человека. Ученым удалось открыть важные секреты происходящих внутри нас процессов. Я просто делаю следующий шаг и применяю эти секреты к детскому сну». (София Аксельрод)
