Geons, Black Holes, and Quantum Foam: A Life in Physics ...

Quantum foam or spacetime foam is the fluctuation of spacetime on very small scales due to quantum mechanics. The idea was devised by John Wheeler in 1955. Background. With an incomplete theory of quantum gravity, it is impossible to be certain what spacetime would look like at small scales. However, there is no reason that spacetime needs to ...

John Archibald Wheeler (July 9, 1911 - April 13, 2008) was an American theoretical physicist.He was largely responsible for reviving interest in general relativity in the United States after World War II.Wheeler also worked with Niels Bohr in explaining the basic principles behind nuclear fission.Together with Gregory Breit, Wheeler developed the concept of the Breit-Wheeler process.

John Archibald Wheeler - Wikipedia

Yes, Wheeler has done research on General Relativity, coining the terms "black hole" and "wormhole". The geons of the title are electromagnetic waves so massive they are held together by their own gravity; by Wheeler's calculations, a torus the size of the Sun and a million times more massive is the smallest one for which quantum effects could be ignored; he also explored geons composed

Geons, Black Holes and Quantum Foam: A Life in Physics by ...

John Archibald Wheeler's fascinating life brings us face to face with the central characters and discoveries of modern physics. He was the first American to learn of the discovery of nuclear fission, later coined the term "black hole," led a renaissance in gravitation physics, and helped to build Princeton University into a mecca for physicists. From nuclear physics, to quantum theory, to relativity and gravitation, Wheeler's work has set the trajectory of research for half a century.

In ' Geons, Blackholes and Quantum Foam' Wheeler states the g in geon stands for for 'gravity', the e is 'electromagnetic radiation' and the 'on' is the word root for 'particle'. Interestingly, Wheeler later proved geons would either 'blow up' or 'implode' very quickly if they were ever to form.
