The judicial reforms in Singapore over the past 15 years have been successful on many counts, and its courts are now regarded as some of the most efficient and effective in the world. This publication examines the lessons that can be drawn from Singapore's experience to help inform similar initiatives in other countries. It highlights how extensive planning prior to initiating reforms and broad-based stakeholder participation through the process were critical to the success of the reforms, as well as benefiting from a unique political and economic context in Singapore.

This book presents a timely assessment of the impact of history, politics and economics in shaping the Singapore Constitution, going beyond the descriptive narrative, the authors will cast a critical eye over the developments of the last 40 years.

Analyzes courts in fourteen selected Asian jurisdictions to provide the most up-to-date and comprehensive interdisciplinary book available.

This publication contains the proceedings of an international conference, held in Guatemala in October 2001, with participants from law schools, judges, practitioners and government officials from a number of Latin American countries and elsewhere. The conference theme focused on the links between judicial excellence, judicial reform and good practices in the performance of judicial education programmes. Topics considered include: the concept of judicial excellence, ethics and the role of human rights training, e-learning and distance education, in-service training and evaluation, the role of education in promoting judicial reform and attitudinal change in the courts system.

Regulating Judges presents a novel approach to judicial studies. It goes beyond the traditional clash of judicial independence versus judicial accountability. Drawing on regulatory theory, Richard Devlin and Adam Dodek argue that judicial regulation is multi-faceted and requires us to consider the complex interplay of values, institutional norms, procedures, resources and outcomes. Inspired by this conceptual framework, the book invites scholars from 19 jurisdictions to describe and critique the regulatory regimes for a variety of countries from around the world.

The main aim of this volume is to analyse common issues arising from increasing judicial power in the context of different political and legal systems, including those in North America, Africa, Europe, Australia, and Asia.

Derived from the renowned multi-volume International Encyclopedia of Laws, this very useful analysis of constitutional law in Singapore provides essential information on the country's sources of constitutional law, its form of government, and its administrative structure. Lawyers who handle transnational matters will appreciate the clarifications of particular terminology and its application. Throughout the book, the treatment emphasizes the specific points at which constitutional law affects the interpretation of legal rules and procedure. Thorough coverage by a local expert fully describes the political system, the historical background, the role of treaties, legislation, jurisprudence, and administrative regulations. The discussion of the form and structure of government outlines its legal status, the jurisdiction and workings of the central state organs, the subdivisions of the state, its decentralized authorities, and concepts of citizenship. Special issues include the legal position of aliens, foreign relations, taxing and spending powers, emergency laws, the power of the military, and the constitutional relationship between church and state. Details are presented in such a way that readers who are unfamiliar with specific terms and concepts in varying contexts will fully grasp their meaning and significance. Its succinct yet scholarly nature, as well as the practical quality of the information it provides, make this book a valuable time-saving tool for both practising and academic jurists. Lawyers representing parties with interests in Singapore will welcome this guide, and academics and researchers will appreciate its value in the study of comparative constitutional law.

This volume addresses the role of the judge and the parties in civil litigation in mainland China, Hong Kong and various European jurisdictions. It provides an overview and an analysis of how these respective roles have been changed in order to cope with growing caseloads and quality demands. It also shows the different approaches chosen in the jurisdictions covered. Mainland China is introducing far-reaching reforms in its system of civil litigation. From an inquisitorial procedure, in which the parties play a relatively minor role, the country is changing to a more adversarial system with increased powers for the parties. At the same time, case management and the role of the judge as it is understood in mainland China remains different from case management and the role of the judge in Western countries, mainly as regards the limited powers of individual Chinese judges in this respect. Changes in China are justified by the ever-increasing case load of the Chinese courts and the consequent inability to deal with cases in an adequate manner, even though generally speaking Chinese courts still adjudicate civil cases within a relatively short time frame (this may, however, be problematic when viewed from the perspective of the quality of adjudication). Growing caseloads and quality concerns may also be observed in various European states and Hong Kong. In these jurisdictions the civil procedural systems have a relatively adversarial character and it is some of the adversarial features of the existing systems of procedure which are felt to be problematic. Therefore, the lawmakers have opted for increasing the powers of the judge, often making the judge and the parties mutually responsible for the proper conduct of civil cases. Starting from opposite directions, mainland China and the various European states and Hong Kong could meet half way in their reform attempts. This is, however, only possible if a proper understanding is fostered of the developments in these different parts of the World. Even though in both China and Europe the academic community and lawmakers are showing a keen interest in the relevant developments abroad, a study addressing the role of the judge and the parties in civil litigation in both China and Europe is still missing. This book aims to fill this gap in the existing literature.

Scholars have generally assumed that authoritarianism and rule of law are mutually incompatible. Convinced that free markets and rule of law must tip authoritarian societies in a liberal direction, nearly all studies of law and contemporary politics have neglected that improbable coupling: authoritarian rule of law. Through a focus on Singapore, this book presents an analysis of authoritarian legalism. It shows how prosperity, public discourse, and a rigorous observance of legal procedure have enabled a reconfigured rule of law such that liberal form encases illiberal content. Institutions and process at the bedrock of rule of law and liberal democracy become tools to constrain dissent while augmenting discretionary political power - even as the national and international legitimacy of the state is secured. This book offers a valuable and original contribution to understanding the complexities of law, language and legitimacy in our time.
