~~Leachables and Extractables Handbook: Safety Evaluation ...~~

A safety assessment for extractables or leachables is the process by which the effect of extractables or leachables on user health is established. As the issues associated with a direct assessment the leachables' effect on patient safety are significant, safety effects are typically assessed indirectly.

~~Identification, analysis and safety assessment of ...~~

¶SCT: Safety Concern Threshold is defined as the threshold below which a leachable would have a dose so low as to present negligible safety concerns from carcinogenic and non-carcinogenic toxic effects. The safety concern threshold (SCT) for extractables and leachables has been defined as 0.15 µg/day.
