The internet has quickly proved itself as an ideal and ever-expanding medium for use by high fashion. Laird Borrelli's sequel to her bestselling Fashion Illustration Now brings her unrivalled knowledge of the international scene to identify the sites that are most effective for the established big names, but also those that are playing to the strengths of the new medium to make an immediate impact from a small or previously non-existent base. Illustrated with exciting visual sequences throughout, Net Mode crystallizes a complex subject into three main themes, Fashion Image, Fashion Sale and Fashion Talk. Fashion defines the contemporary and is itself defined by constant change, qualities that are also shared by technology. This lively, beautifully designed but always informative survey will be an essential purchase for anyone in the fashion world, anyone interested in fashion, or anyone involved - creatively or commercially - with the Internet.

This new edition of a bestselling textbook is designed for students, scholars, and anyone interested in 20th century fashion history. Accessibly written and well illustrated, the book outlines the social and cultural history of fashion thematically, and contains a wide range of global case studies on key designers, styles, movements and events. The new edition has been revised and expanded: there are new sections on eco-fashion, fashion and the museum, major changes in the fashion market in the 21st century (including the impact of new media and retailing networks), new technologies, fashion weeks, the rise of asian fashion centers and more. There are twice as many illustrations. In its second edition, A Cultural History of Fashion in the 20th and 21st Centuries is the ideal introductory text for all students of fashion.

Few phenomena embody the notion of time as well as fashion. Fast-moving and rooted in the 'now', it's constantly creating its own past through the process of rapid style change. Uniquely poised between the past and the future, fashion's relationship with time is unorthodox. Rather than considering time in the conventional sense, this anthology explores three alternative ways to think about fashion and time: the first identifies the seasonal nature of fashion as an industry, and shows how this has impacted on workers and wearers alike. The second looks at fashion design as a ceaseless process of adaptation, reconstruction and recombination of motifs, in which nostalgia and revivals play their part. The third construes fashion's 'imaginary', with its capacity for fantasy and myth-making, as a form of alternate history that asks 'what if?' Within this framework, key classic texts are juxtaposed with lesser known ones, in an interdisciplinary approach that includes philosophy, history, literature, media and fashion design, ranging from the 18th century to the present. It will be of interest to anyone wishing to understand one of the most complex yet inescapable aspects of fashion, its relationship to time, and will be a critical resource for undergraduate and postgraduate students in the humanities and all those interested in fashion in all its creative, commercial and cultural aspects.

Just as the clothes we wear can communicate our personality and how we want to be perceived, so fashion can reflect the politics and preoccupations of the society that produced it. A Cultural History of Western Fashion guides you through the relationships between haute couture and ready-to-wear designer fashions, popular culture, big business, high-tech production, as well as traditional and social media. Exploring fashion's interdisciplinary nature, English and Munroe also highlight the parallel evolution of clothing design and the other visual arts over the last 150 years. This new edition includes expanded coverage of the build up to the First World War and brings this classic text up to date. There is also a new chapter on smart textiles and technology, exploring the work of Hussein Chalayan and Iris Van Herpen among others, and expanded coverage of the role of sustainability in the contemporary fashion industry, including biosynthetic textile production and Stella McCartney's use of vegan leather.
