It's the beauty within us that makes it possible for us to recognize the beauty around us, the question is not what you look at but what you see. – Henry David Thoreau Our Favorite Products shop -

Beauty Within - In-Depth Skincare Reviews & Top-Rated Products
Nearly eight in 10 (79%) said they have bought or considered buying a beauty-from-within supplement. Examples of products purchased include those containing plant extract, such as grape seed, aloe vera, and products containing vitamins, minerals, or collagen. For collagen products, the decision to buy a product lies in whether the collagen peptide is patented or clinically tested.

Rejuvenate your beauty regime from within with HUM Nutrition
India-based nutraceutical and cosmeceutical company Pure Nutrition has launched a range of cosmetic products to capitalise on the potential of the country’s US\$ billion-dollar beauty market. The new range consists of three skin care products and one hair care product made from natural ingredients, said the company.

Pure Nutrition launches cosmetics range to tap into India...
Cosmetics and beauty products may seem like a whole different ball game, but there are some leaders in the industry proving that wrong. With a strong marketing and PR strategy – including creative collaborations with influencers – consumers are just as likely to shop for beauty products online and conversely, digital media can be used to attract them to stores .

Digital Marketing Trends Overtaking The Beauty Industry...
If we look at the med-tech industry, there is a natural transfer of principles from home med-tech into beauty. At the heart of it, well designed home use med-tech devices work alongside drug formulations to holistically meet a common objective of preventing, managing or improving patient health.

Nutritional cosmetics is an emerging area of intense research and marketing and encompasses the concept that orally consumed dietary products can support healthier and more beautiful skin. There are numerous dietary ingredients now being marketed for their potential skin health and beauty benefits and many of these are supported by growing scientific evidence. The purpose of this book is to compile the scientific evidence showing the potential benefits of some of the more extensively researched ingredients. As far as possible, information about the benefits of ingredients consumed orally for skin health is presented. The information contained in this book will help provide insights into an emerging research area and provide scientific background for the potential clinical effectiveness for some of the better researched nutraceutical ingredients. ABOUT THE EDITORS Aaron Tabor, M.D. is the CEO of Physicians Pharmaceuticals and author of *The Revival Slim & Beautiful Diet*. A graduate of the Johns Hopkins School of Medicine, Dr. Tabor oversees all clinical research on the Revival Slim & Beautiful Diet plan, conducting randomized, double-blinded, placebo-controlled studies at leading hospitals in the U.S. Areas of note include weight loss, skin/hair/nail appearance, energy, menopause, PMS, cholesterol, memory, and diabetic health. He is also responsible for directing new Revival product development based on clinical research results. Robert M. Blair, Ph.D. is the Research Manager for Physicians Pharmaceuticals, Inc. and manages the daily activities of the Research and Nutrition departments. Dr. Blair received his Ph.D. from Oklahoma State University in the field of Reproductive Physiology. Before joining Physicians Pharmaceuticals, Inc., he worked as an Assistant Professor of Comparative Medicine at the Wake Forest University School of Medicine where he examined the effects of dietary soy on cardiovascular health and cognitive function. Reviews the most-popular and most-researched nutraceutical ingredients Presents information specifically about the benefits of ingredients consumed orally for skin health Considers the benefits of whey protein, rosemary, soy – and green tea and milk thistle, specifically, for protection against sun damage and photocarcinogenesis Provides information on antioxidants, incl: potential benefits of botanical antioxidants; carotenoids; coenzyme Q10; healthy fruits; olive fruit; and natural enzymes

This extraordinary reference describes the scientific basis, summarizes the existing evidence that functional food for skin really works, and addresses the key questions asked by dermatologists and patients when it comes to practical aspects of nutrition based strategies in clinical and cosmesical dermatology. It is believed that this helpful guide will become the golden standard, the ‘bible’ for this given topic, which will be used by dermatologists, industry people and interested patients.

We will all live decades longer than our grandparents and parents and will have better health in our later years. With this enhanced longevity, we all want to look as young as we feel. Especially because we are inundated with images of youthful beauty on television, in films, and in glossy fashion magazines, we feel social pressure to improve our appearance. Aspiring to maintain “eternal youth” and to look good is not new and is not just superficial “vanity.” Our human nature dictates that we take care of ourselves and enhance our appearance. Throughout history, women from Cleopatra to Marie Antoinette to today’s movie stars have used cosmetics and nutrients to beautify and rejuvenate. Indeed recent psychological studies have proven that the better we look, the better we feel, and the healthier, happier, and more productive we become.

Celebrated author of *The Green Beauty Guide* Julie Gabriel presents a comprehensive yet simple book that brings all four corners of the natural beauty paradigm together: natural skincare, holistic nutrition, stress-relief, and healthy lifestyle. A holistic nutritionist, Gabriel teaches her reader how to ‘eat yourself beautiful’ using building blocks from a wholesome diet, and as a long-time beauty writer and editor, reveals why beauty-boosting changes to our everyday lifestyles are essential in helping us to discover the allure we are looking for. Holistic Beauty from the Inside Out claims that true beauty radiates from inner physical and emotional harmony. Our body is equipped with a full set of tools to maintain and restore our intrinsic assets, and has enormous healing powers to rejuvenate our skin, hair, and nails. The book includes handy and straightforward lists of what products to avoid, what foods to eat, and natural recipes to use for skincare.

BIOPROSPECTING OF PLANT BIODIVERSITY FOR INDUSTRIAL MOLECULES A comprehensive collection of recent translational research on biosource utilization and ecological sustainability Bioprospecting of Plant Biodiversity for Industrial Molecules provides an up-to-date overview of the ongoing search for biodiverse organic compounds for use in pharmaceuticals, biocuticals, agriculture, and other commercial applications. Bringing together work from a panel of international contributors, this comprehensive monograph covers natural compounds of plants, endophyte enzymes and their applications in industry, plant bioprospecting in cosmetics, marine bioprospecting of seaweeds, and more. Providing global perspectives on bioprospecting of plant biodiversity, the authors present research on enzymes, mineral micro-nutrients, biopesticides, algal biomass, and other bioactive molecules. In-depth chapters assess the health impacts and ecological sustainability of the various biomolecules and identify existing and possible applications ranging from ecological restoration to production of essential oils and cosmetics. Other topics include, bio-energy crops as alternative fuel resources, the role of plants in phytoremediation of industrial waste, and the industrial applications of endophyte enzymes. This comprehensive resource: Includes a thorough introduction to plant biodiversity and bioprospecting Will further the knowledge of application of different plants and improve research investigation techniques. Summarizes novel approaches for researchers in food science, microbiology, biochemistry, and biotechnology Bioprospecting of Plant Biodiversity for Industrial Molecules is an indispensable compendium of biological research for scientists, researchers, graduate and postgraduate students, and academics in the areas of microbiology, food biotechnology, industrial microbiology, plant biotechnology, and microbial biotechnology.

The role of Bioactive Dietary Factors and Plant Extracts in Preventive Dermatology provides current and concise scientific appraisal of the efficacy of foods, nutrients, herbs, and dietary supplements in preventing dermal damage and cancer as well as improving skin health. This important new volume reviews and presents new hypotheses and conclusions on the effects of different bioactive foods and their components derived particularly from vegetables, fruits, and herbs. Primary emphasis is on treatment and prevention of dermal damage focusing on skin cancers with significant health care costs and mortality. Bioactive Dietary Factors and Plant Extracts in Preventive Dermatology brings together expert clinicians and researchers working on the different aspects of supplementation, foods, and plant extracts and nutrition and skin health. Their expertise provides the most current knowledge in the field and will serve as the foundation for advancing future research.

Nutrition is the fastest-rising beauty trend around the world. Eat Pretty simplifies the latest science and presents a userfriendly program for gorgeous looks, at any age, that last a lifetime. Buzzwords like antioxidants, biotin, and omega-3s are explained alongside more than 85 everyday foods, each paired with their specific beauty-boosting benefit: walnuts for supple skin, radishes for strong nails. But healthful ingredients are just one aspect of beauty nutrition. Eat Pretty offers a full lifestyle makeover, exploring stress management, hormonal balance, and mindful living. Charts and lists, plus nearly 20 recipes, make for a delicious and infinitely useful eBook—in the kitchen, at the grocer, and on the go.

Based on Nobel Prize-winning research, an easy-to-follow lifestyle plan for losing weight, looking younger, and feeling energized.

“This book is very easy reading and took me back to previous biology courses. The author questions the role of certain parts of the cell. The chapters on food chemistry with emphasis on vitamins and their role in our everyday life were quite illuminating. I believe that Leonard Sonnenschein has given us new insight into the metabolism of plants and animals.” Nathaniel H. Murdock, M. D. Past President of the National Medical Association Associate Professor at the Washington University School of Medicine Board certified in obstetrics-gynecology Description: Everything you learned about metabolism in your first science class is wrong! Every generation has become astounded by the advances in science within their generation. This book will review what is known about cellular metabolism and how it governs your health. You will then be amazed how the absorption of nutrients affects your wellness, your beauty and longevity. You will also find out that most nutritional supplements, most cosmetics and, indeed, most pharmaceuticals are not designed for optimal absorption, therefore you are not getting the necessary nutrition and other products that you expect and need for the best life. You will find out about BOOSTER, which is based on an organic and natural process of the cell that can change your life, and how it’s technology can be included in your consumer choice of the nutritional, pharmaceutical and cosmetic products you use. Come explore this fascinating discovery that can help you! *Proceeds from the sale of this book go to support the World Aquarium and its Conservation for the Oceans Foundation In this book, we lay out a detailed analysis of how the cell works and presented a new theory that the cell is not controlled by the nucleus, but rather by the cell wall. We then show the logic of this mechanism for modulation of immunity, nutritional status, transmission from extra cellular status to intercellular delivery, and the data supporting this new theory. When using this mechanistic understanding of this new metabolic pathway for plants and animals, it necessitates the change in most formulations for improved active ingredient action of the products we use for nutrition, cosmetics, animal and plant culture, and health. To improve cellular action, the ionic consistency of the active ingredient(s) need to balance with the intracellular status. Furthermore, if the desired active ingredient for intracellular transmission is larger than the normal size pore of the cell being targeted, then a transitory delivery mechanism needs to be employed. BOOSTER is such a mechanism. Results from independent laboratory trials show that BOOSTER’s delivery methodology can yield ten times the absorption of large molecule products into the cell for metabolic transmission. Additional studies for the past 20 years have shown that GroFish’s ionic assualts to the cell wall can stimulate improved cell states such as immunity, growth, hormonal and energy status. This translates to improved methods of agriculture and aquaculture. Indeed, this methodology can deliver healthier animals, more nutritious food products and be beneficial to the environment. We, as consumers, can participate in this health and sustainability revolution by demanding that the products we eat, use for wellness and cosmetics include BOOSTER and GroFish technology.
