This comprehensive textbook provides a broad reveiw of kidney diseases with regards to symptoms, investigation and treatment. It deals with a variety of clinical entities like glomerulonephritis, kidney stones, hypertension, urinary infection and renal failure. The in-depth chapters deal with dialysis and kidney transplantation as well as renal therapeutics which are currently practiced in the latest combed from a broad range of medical journals, distilled and combined with the author's own experience and practice in nephrology since 1975 when he first embarked on his career as a kidney specialist.This third edition has 7 new chapters reflecting the latest changes in nephrological practice, totalling 35 chapters as compared to the last edition of 27 chapters.The new chapters include recent clinical trials, aging kidneys, cardiorenal syndrome, the geography and evolution of glomerulonephritis, IgA nephritis in a distinct Glomerular disease, acute poisoning and research in kidney diseases. These updated topics will allow the reader to keep abreast of the latest trends in nephrology, with abstracts/summaries included for easy reference to the original text/articles.Written in a clear and concise style, this invaluable textbook serves as a practical guide for medical students, doctors, nurses and other medical and paramedical personnel in kidney diseases.

This book presents contributions from leading international experts in the field of nephrology. Each chapter is independent and discusses nephrology in the author's country, including the history of nephrology development, kidney disease epidemiology, clinical nephrology, dialysis practice in acute and chronic renal failure settings (hemodialysis, hemodiafiltration, peritoneal dialysis), pediatric nephrology, and kidney transplantation. In addition, the book covers topics such as the job market for nephrologists, reimbursement, nephrology education, and the number of professionals in the private and public sectors. With 53 chapters and more than 300 authors from all continents offering a unique perspective on nephrology practice, it provides a much-needed information source for nephrologists around the globe. The reader will be able to travel through Nephrology Worldwide, a pleasant reading experience with not only relevant information and updated data, but also a comprehensive look at the history, countries' peculiarities, and a critical analysis of the scenario of nephrology and renal replacement therapy. A valuable resource for healthcare professionals and other stakeholders interested in learning about the status quo of Nephrology Worldwide. Both the failings and the successes are outlined in a way that should make this book a compelling read, not just for the well-informed renal physician, but also for planners and policy makers whose thinking and actions are integral to the way we practice medicine. - Sir Peter J. Ratcliffe, Nephrologist and 2019 Nobel Prize Winner More information on the Nephrology Worldwide initiative can be found at www.nephrologyworldwide.com.

Provides a (one-stop) resource for access to information written by world-leading scholars in the field Meticulously organized, with articles split into three clear sections, it is the ideal resource for students, researchers and professionals to find relevant information Contains concise and accessible chapters that are ideal as an authoritative introduction for non-specialists and readers from the undergraduate level upwards Includes multimedia options, such as hyperlinked references and further readings, cross-references and videos

This book is a new and improved revision of the Textbook of Clinical Medicine for Asia. It is ideal as a standard medical text for students and physicians in Asia, as well as a reliable resource for physicians and researchers involved in treating Asians in the West. The book aims to outline approaches to the diagnosis and treatment of medical conditions that are common to the region or its peoples. Each chapter includes an introduction to the basic concepts and current status in a medical speciality such as cardiology, gastroenterology, neurology and rheumatology. The chapters are based on local practice and regional expertise with statistics and experience unique to the Asia-Pacific region. Thus the book reflects the knowledge and experience of the disease patterns in the region.
