Teaching pupils the skills of interpretation in such a precedent-defying discipline as contemporary visual art poses the question of the status of knowledge. The anti-traditional nature of contemporary visual art means that there is no accompanying stable or substantive body of knowledge, but rather a plethora of theoretical and critical texts which ebb and flow around and within the art.

This book aims to help readers interpret, and reflect on, their reading more effectively. It presents doctrines of ancient and renaissance rhetoric (an education in how to write well) as questions or categories for interpreting one's reading. The first chapter presents the questions. Later chapters use rhetorical theory to bring out the implications of, and suggest possible answers to, the questions: about occasion and audience (chapter 2), structure and disposition (3), narrative (4), argument (5), further elements of content, such as descriptions, comparisons, proverbs and moral axioms, dialogue, and examples (6), and style (7). Chapter eight describes ways of gathering material, formulating arguments and writing about the texts one reads. The conclusion considers the wider implications of taking a rhetorical approach to reading. The investigation of rhetoric's questions is interspersed with analyses of texts by Chaucer, Sidney, Shakespeare, Fielding and Rushdie, using the questions. The text is intended for university students of literature, especially English literature, and rhetoric, and their teachers.

This book presents a comprehensive theory of legal interpretation, by a leading judge and legal theorist. Currently, legal philosophers and jurists apply different theories of interpretation to constitutions, statutes, rules, wills, and contracts. Aharon Barak argues that an alternative approach--purposive interpretation--allows jurists and scholars to approach all legal texts in a similar manner while remaining sensitive to the important differences. Moreover, regardless of whether purposive interpretation amounts to a unifying theory, it would still be superior to other methods of interpretation in tackling each kind of text separately. Barak explains purposive interpretation as follows: All legal interpretation must start by establishing a range of semantic meanings for a given text, from which the legal meaning is then drawn. In purposive interpretation, the text's "purpose" is the criterion for establishing

which of the semantic meanings yields the legal meaning.

Establishing the ultimate purpose--and thus the legal meaning--depends on the relationship between the subjective and objective purposes; that is, between the original intent of the text's author and the intent of a reasonable author and of the legal system at the time of interpretation. This is easy to establish when the subjective and objective purposes coincide. But when they don't, the relative weight given to each purpose depends on the nature of the text. For example, subjective purpose is given substantial weight in interpreting a will; objective purpose, in interpreting a constitution. Barak develops this theory with masterful scholarship and close attention to its practical application. Throughout, he contrasts his approach with that of textualists and neotextualists such as Antonin Scalia, pragmatists such as Richard Posner, and legal philosophers such as Ronald Dworkin. This book represents a profoundly important contribution to legal scholarship and a major alternative to interpretive approaches advanced by other leading figures in the judicial world.

This unique book brings together leading experts from diverse areas of public international law to offer a comprehensive overview of the approaches to evolutionary interpretation in different international legal regimes. It begins by asking what interpretation is, offering the views of expert authors on the question, its components and definitions. It then comments on situations that have called for evolutionary interpretation in different international legal regimes, including general international law, environmental law, human rights law, EU law, investment law, international trade law, and how domestic courts have, on occasions, interpreted treaties and other international legal instruments in an evolutionary manner. This timely, authoritative compendium offers an in-depth understanding of the processes at work in evolutionary interpretation as well as a prime selection of the current trends and future challenges.
